

Euro Series Windows

Similar in design and function to our EuroGlide Doors, Quantum's Euro Series windows feature stile and rail construction, multi-point locking hardware, and exceptional weather-stripping. Versatile styles distinguish the Euro Series: Pivot, Tilt/Turn, Outswing and Inswing windows.

Pivot windows swing in at the top and out at the bottom providing equal ventilation. A stay mechanism holds the sash partially open, and can be released to pivot the sash 180°. Multi-point locking hardware provides secure closure at the sash rails.

Tilt/Turn windows operate in two directions. They tilt in at the top providing ventilation without exposing the head of the window sash to the weather, and swing in like a casement providing an egress exit. The sash and jamb have a stepped, interlocking design fitted with exceptional weather-stripping. An aluminum extrusion across the bottom captures water and directs it outside, even when the window is open.

The Casement permits oversized windows in this style. The single handle and multi-point locking system make it advantageous for numerous applications. When open, the Outswing window is held securely in place even in windy conditions. The Inswing French Casement requires no center post and can be discreetly screened on the exterior.

Take a closer look. It's all in the details and Quantum pays particularly close attention to *all* the details.

Euro Window Series

At Quantum, it's all in the details and we believe our details are what make every Quantum window and door a superior choice. We invite you to take a closer look—at the premium wood species, the craftsmanship of the joinery, the hardware and the glass options.

Take a closer look. It's all in the details.

Dual-sealed insulating glass units

- Cardinal Low-E
- Argon filled
- High performance foam spacer
- Set in caulk, not taped on
- Removable exterior stops

Exceptional milling and joinery

- VG Douglas Fir standard species with many other wood species available including split species and reclaimed, recycled and salvaged woods
- Grain and color matching standard
- Hand sanded
- Sash joins are dowel reinforced and glued
- Minimum jamb is 2-3/16"
- Casement, pivot, tilt/turn

Heavy-duty, multi-point locking hardware

- Bronze or silver finish standard
- Optional styles and finish colors available

True divided lites and finishing

- Precise sight lines assured
- Always true, never simulated
- No finish is standard, but multiple finish options are available including primer, finish coat, and finishes with breathable and high endurance properties

15/5/3 Warranty
