

Quantum is pleased to offer Q-Shell by Chemcraft, an enduring finish that is formulated for use in nearly any environment. Q-Shell has been tested in real-world extreme climates from the cold of the Arctic Circle to the heat and humidity of the Far East.

Q-Shell protects and enhances Quantum Windows & Doors beautifully. And, factory finishing means there is less finishing and cleanup time required on the job site, saving in-field labor.

Q-Shell is a two-component catalyzed polyurethane application. An ideal finish for either interior or exterior use and it can be top coated with 100% acrylic paint.

- dries to a tough, durable finish
- excellent weathering properties
- chemical and abrasion resistance
- 3-year warranty

Quantum offers an attractive array of stain colors or select from pigmented colors. Custom matched colors are also an option.

Q-Shell Solid Colors on VG Douglas Fir

These colors may not be an accurate depiction of the actual color. We recommend you request color finish samples on the wood species of choice from your Quantum Representative.

Note: Dark stains and paints contribute to excessive heat buildup that may cause wood windows and doors to dry out depending on their exposure. Loss of moisture may result in warpage and/or bowing that may affect the warranty.
