Classic Series Windows

Classic Series windows provide the utmost flexibility in aesthetics, design and functionality. For use in contemporary architectural styles, the **Classic Series** is sleek in appearance. A common mullion system can be built to specified depths and utilized to create window wall systems that include both operable and fixed components. This creates the most narrow and clean appearance possible negating the need for any trim or mullion caps.

A stainless steel four bar hinge is used standard. We also provide a butt-hinge option to satisfy egress requirements which can also be specified for units exceeding typical casement heights or if there is a desire to match hinges on adjacent doors.

For ultimate security, the **Classic Series** window can be equipped with a true European multipoint latching system that latches the window along multiple locations around the perimeter of the sash with the use of a single window lever.

Classic Series windows can be built as casements, awnings, rounds, arches, and window walls with a full complement of options to complement your design palette.

In applications where a clad product may be more desirable, we have added **Quantum Clad** to our list of **Classic Series** window options. Ask your Quantum Representative about the available styles, colors and pricing.
