

Signature Series Windows

Quantum's **Signature Series** offers casement, fixed, awning and special shaped windows with contemporary styling, narrow sight lines and large expanses of glass.

The sleek framework nearly disappears as the contemporary look of the **Signature Series** puts the emphasis clearly on the glass. A more traditional appearance can be achieved through the addition of heavier sills, fixed sashes and true divided lites.

Signature Series windows offer tremendous design flexibility along with the natural beauty and warmth of the finest wood species available. Clear Vertical Grain (CVG) Douglas fir is standard and yields a rich appearance that begs to be touched. Many other woods are available to complement the design and detail of the project, including dual species.
